

The Troost Festival

Remembering History • Sharing a Vision

April 19th

Please, Troost Folks

INVITE your NEIGHBORS (BOTH SIDES OF TROOST)

- Instead of a dividing line, we see Troost as a meeting place.
- We see dialogue as the way to build 'social capital'.
 - Social capital soon becomes 'economic capital'.
- Development without displacement is our vision.

Troost Village will come alive through an integral dialogue:

INTEGRAL Once we have realized our personal wholeness, we begin creating a global community of dynamic unity, concerning ourselves with 'the whole beyond the parts'. Only integral people will create an Integral Global Community! (Village)

TRANSCULTURAL Culture is beyond ego-centric, ethno-centric, racial-centric, and nationalism, beyond multi-cultural tolerance to a community in which diverse people live to capacity and creativity within the Spirit.

PARTICIPATION Moving beyond totalism and individualism to dialogue and synergism becomes evolutionary responsibility. Sovereignty begins and ends with each person being valued within a mature, participatory democracy.

ENABLING When we shift from coercive to enabling power, life is open to beauty and freedom (i.e. Instead of making each other do what we would not do, we enable each other to do what we could not do).

SYSTEMIC Economy is 'spontaneous flow of all resources' that are essential in 'composing community': art, communication, community, education, environment, health, justice, resources, science and spirituality.

SPIRITUAL With freedom and responsibility, each person goes beyond self-interest to passionate, self-transcending concern. Work becomes spiritual synergy in which a living culture brings people together in stimulating, meaningful, and challenging ways.

We are asking you to involve five (5) of your friends at the 'DIALOGUE TENT' during the TROOST FESTIVAL in order to INITIATE VILLAGE BUILDING.
